Various	2002557		Various	Exempt	Traffic Management System Project	ITS Program Contracted Services	Statewide INRIX Traffic Data for FY 25

**\*US 50 DES 170062:** The entire project limits are only 1960 LFT, so we are well below the 1 mile threshold for air quality regulations. The auxiliary lane itself has a 550’ taper to develop the lane, a full lane width length of 860 LFT, and a taper length of 550’ to drop the lane; for a total of 1960 LFT. There two intersections, CR 1225 and CR 1250. From the start of the project heading east, there is a taper to create a turn lane for CR 1225 (Des No 1700161). Instead of tapering back to a two lane road and immediately tapering back out to make room for a left turn lane at CR 1250 (Des No 1700162); we carried the third lane between the two intersections, which becomes a two way left turn lane before becoming a dedicated left turn lane for CR 1250. After the intersection of CR 1250, the road tapers back to a two lane road.
